

# Naava

NAAVA ONE

NAAVA DUO

NAAVA FLOW DUO

NAAVA FLOW

Naava's aim is to reconnect humanity with nature. The smart green walls improve indoor air quality and its biophilic design bring nature inside, promoting a feeling of health and wellbeing.

## FEATURES

- Free standing model or room divider
- Optional magnetic whiteboard
- White or graphite black colour options
- 12 selected plant species

## EFFECTS

Cognitive performance is improved

Fatigue is halted

Illness is reduced

Reduces harmful chemicals

Optimise humidity

Naturalises indoor air

## DIMENSIONS

### Naava One

- 100 x 210 x 35 cm
- purification efficiency: room up to 60 m<sup>2</sup>

### Naava Duo

- 100 x 210 x 50 cm
- purification efficiency: room up to 60 m<sup>2</sup>

### Naava One Slim

- 100 x 210 x 21 cm
- purification efficiency: room up to 60 m<sup>2</sup>

### Naava Flow

- 100 x 130 x 35 cm

- purification efficiency: room up to 40 m<sup>2</sup>

### Naava Flow Duo

- 100 x 130 x 50 cm
- purification efficiency: room up to 40 m<sup>2</sup>

## MAINTENANCE SERVICE INCLUDED

- Maintenance service comes with any Naava purchase
- Real time information of the green wall's function
- Automated irrigation and air circulation adjustments
- Plants are replaced when needed, and they are frequently trimmed to make sure walls always look fresh.

## WELLBEING IMPACT

Most of us live in cities, isolated from nature. Breathing sterilised, manmade air, a thousand times in an hour.

This is actually one of the biggest environmental health risks of our generation according to the World Health Organisation. We all need to breathe, yet we typically don't know whether our indoor air is healthy or not. We spend about 22 hours a day indoors, breathing more than 10,000 litres of questionable air. Let us help to ensure that your air is good for you and your team, with the added health benefits of our biophilic design solution.

## BIOPHILIC DESIGN

Although we spend most of our time indoors, our need to feel connected to nature hasn't disappeared. Biophilic design aims to create a natural environment indoors. Incorporating elements of nature into the built environment has been demonstrated through research to reduce stress, blood pressure levels and heart rates, whilst increasing productivity, creativity and self-reported rates of wellbeing. This simple touch helps you relax and recover. Our personal experience at Welltek is that since we've installed Naava walls in our office, we feel more alert in the afternoons and we drink less caffeine. Some have noticed an improvement in their skin. We also enjoy the waterfall sound – at least once a day (or when required) the Naava wall will automatically water itself which is a very calming and reassuring sound.

### HOW DOES NAAVA WORK?

1. Indoor air is absorbed through the plants' roots and the soilless growth medium.

2. The microbes of the roots purify the air of harmful chemicals.

3. The fans return the pure and naturalised air back into the room.

4. The sensors of the smart green wall measure the variables of Naava and its surroundings.

5. Naava's artificial intelligence analyses and directs functions automatically.

6. The remote system transmits information (e.g. from weather satellites) to the smart green wall.

7. The functions are tracked in real time. In case of malfunction, the system will automatically repair itself or send over maintenance personnel.
