## ACOUSTICS

There isn't currently an industry standard for measurement, hence Framery does not publish their test results. The only answer is to try it for yourself. ISO 23351 - 1 is a new standard that is in the final phase of ISO's approval process.

## SUSTAINABILITY

All wood materials that go into Framery pods come from FSC or PEFC sources. The felt is made from 60-70% recycled plastics – a large percentage from recycled plastic bottles. The acoustic foam is made from 60% recycled polyester fibres. Both the fan and the light are triggered

by a motion sensor to limit the amount of electricity used.

## WELLBEING IMPACT

The open plan office is likely to be here to stay, but privacy is an issue. Noise pollution is an issue which affects many people, leaving people stressed and unable to concentrate. On average, people lose as much as 86 minutes a day due to the lack of privacy. People need quiet places to go for focused work, confidential calls & ad hoc meetings. Framery has introduced privacy to the open plan office.
